

Year	Name	Hospital	Title of Presentation
2000	TANG Wai Man	QMH	Prophylactic antibiotics in total joint arthroplasty
2001	CHAN Wai Fu	PYNEH	Deep vein thrombosis with duplex ultrasonography after total knee and hip arthroplasty in Hong Kong
2003	CHEUNG Kin Wing	PWH	Effect of drain pressure in total knee arthroplasty
2004	YAU Wai Pan	QMH	Residual posterior osteophyte – will it affect flexion range after total knee replacement?
2005	TANG Wai Man	QMH	Assessment of pelvic rotation: a comparison of 3 months
2011	YAN Chun Hoi	QMH	Cementation technique and mechanical alignment, which is more important to the survivorship of low contact stress mobile-bearing total knee arthroplasty? – A study of minimum 7 years follow-up
2012	YAN Chun Hoi	QMH	A randomized controlled trial comparing patient specific instrument with conventional instrument and computer navigation in total knee arthroplasty
2013	YAN Chun Hoi	QMH	A randomized controlled trial comparing TruMatch Instrument with conventional instrument in total knee arthroplasty
2014	YAN Chun Hoi	QMH	Patient specific instruments do not improved the radiological and clinical outcomes in total knee arthroplasty: a randomized controlled trial with minimum 2 years follow up
2015	NG Fu Yuen	QNH	Total knee replacement can be safely performed on Octogenarian – A review of data from 2009 to 2014
2016	NG Fu Yuen	Private	Multimodal analgesia using periarticular injection plus continuous femoral nerve block versus periarticular injection alone after total knee arthroplasty (TKA) – A Prospective, Crossover, Randomised Clinical trial
2017	YAN Chun Hoi	QMH	The use of body exhaust suit system in primary total knee arthroplasty: Randomized trials
2018	CHUNG Kwong Yin	PWH	Long term survivorship of high tibial osteotomy: 10 years follow-up in PWH and AHNH
2019	CHAN Ping Keung	QMH	Combined periarticular and Intravenous Steroid Injection Reduce Early Postoperative Pain after Total Knee Arthroplasty: A Prospective Double-Blinded Placebo Controlled Randomized Controlled Trial

2020	Amy CHEUNG	QMH	The burden of disease in patients awaiting joint replacement surgery – a Study of 2091 patients
2021	CHAN Ping Keung	QMH	Oral supplementation of Vitamin D deficiency to reduce postoperative complications after knee arthroplasty: a randomised controlled trial
2022	Lawrence LAU	CUHK	Functional impact of joint line obliquity and clinical decision making
	Amy CHEUNG	QMH	How much waste do we generate? Steps towards greener arthroplasty
2023	Gloria Y.T. LAM	AHNH	Functional impact of joint line obliquity and left-right symmetry in patients with Oxford Unicompartmental Knee Arthroplasty (OUKA)
2024	Henry FU	HKU	Prospective double-blinded randomized controlled trial on robotic arm assisted versus conventional one-stage bilateral total knee arthroplasty with two year follow-up
